

The Rebuilding of the Cadastre in Kosovo

**Tor VALSTAD and Ole-Jørgen HAUGHOLT, Norway/Kosovo and
Hyzri LLABJANI, Kosovo**

Key words: Kosovo Cadastral Agency, KCA, Cadastre, Property Rights Register.

ABSTRACT

This paper deals with the present process of reconstructing a cadastre that has been left with big holes after a long ethnic conflict, which ended in a war in 1999. UN and three donor countries agreed upon a three-year programme to rebuild the cadastre. The build up of capacity, competence, organisation, technology, equipment, reference network and communication is a huge and exciting task necessary to suit the cadastre to a market economy.
