

The Comprehensive Cadastre – The Tool Comprising the Wisdom of the Ages to Master the Challenges of the Modern World

Juürg Kaufmann (Switzerland)

Key words: Cadastre; Digital cadastre; e-Governance; GSDI; Land management; Legislation; Spatial planning; Valuation;

SUMMARY

The Statement 1 of the FIG Brochure 'Cadastre 2014' says: Cadastre 2014 will show the complete legal situation of land including public rights and restrictions. Based on this statement the author launches the 'Comprehensive Cadastre' as a tool for sustainable landmanagement which will be increasingly important to master the future challenges. The design, the content, and the processes of the Comprehensive Cadastre will be explained. The criteria and the preconditions for successful implementation are outlined with the help of practical developments in this field.
