

The Implementation of BIM in Slovakia – State of the Art

Alojz Kopáčik, Ján Erdélyi and Tomáš Funtík (Slovakia)

Key words: Engineering survey; Legislation; Quantity surveying; Standards

SUMMARY

The present state in the field of BIM implementation in Slovakia will be presented and discussed. The paper brings information about the activities of the Slovak BIM Association, the role of which is the systematic implementation of BIM in Slovakia. Activities aimed at the dissemination of experiences for professionals, education activities in cooperation with STU in Bratislava and the first steps leading to standardisation of BIM in Slovakia are described and explained. In 2017 survey of BIM exploitation was performed in cooperation with the key professional organisations including the Chamber of Surveyors. The results of this survey will be presented also.
