and Sustainable
Resource Management
for All

Presentation of the UAVs Used for the Study

**UAV with Multispectral Camera::
DJI MAVIC 3 M RTK**

Multispectral bands:

- Green: 560 ± 16 nm
- Red: 650 ± 16 nm
- Red Edge: 730 ± 16 nm
- Near-Infrared: 860 ± 26 nm

Presentation of the UAVs Used for the Study

UAV with Lidar Sensor: DJI M300 RTK avec Lidar DJI L1

- 45 MP sensor
- Lidar with 240,000 points/s and 3 returns
- 45-minute battery life
- Non-repetitive scan model and repetitive scan model

Benefits, Limitations, and Prospects of UAVs in Agriculture

- **Precise crop monitoring**
 - **Optimized irrigation and input usage**
 - **Improved performance**
 - **Reduced operational costs**
- **Data processing complexity**
 - **High initial cost**
 - **Regulations and privacy**
- **Technological improvements needed**
 - **Training and education programs**
 - **Integrated solutions development**
