

Hillsborough County's Roadway Asset GIS Street Infrastructure Survey & System Integration

Dr. Kurt NOVAK, USA

Key words:

ABSTRACT

In August 2000, TRANSMAP Corporation completed the creation of an asset management system for the Public Works Department of Hillsborough County Florida. TRANSMAP created an accurate road centerline basemap for approximately 3,000 miles of County roadway and inventoried more than half-million asset features. The asset data was then loaded into Hansen Asset Management Software for the Public Works department to update and maintain their existing infrastructure.
